

Is your child's car seat fitted correctly?

WHY WORRY?:

Currently, in Ireland, incorrectly fitted child car seats are a significant cause for concern, with **as many as 3 out of 4 seats potentially fitted incorrectly**. If a child car seat isn't fitted correctly, it **could lead to a serious or fatal injury in the event of a collision**. The 'Check it Fits' Service will help parents and guardians to fit child car seats and restraints correctly, providing peace of mind that their children are safely restrained in the car.

WHERE TO GET HELP?:

The RSA's team of experts will check child car seats and restraints to see if they are correctly fitted at a designated area in the car parks of the locations listed below. If child car seats or restraints are incorrectly fitted, the experts will advise on how to fix the problem,

demonstrate how to fit the restraint correctly and answer any queries participants might have. The checking process takes about 10-15 minutes and is free of charge.
