APPROACHING JUNCTION 22

GO STRAIGHT AHEAD  
FOR N8, N20, N25  
PARKING AND  
HUGUENOT QUARTER

GO RIGHT FOR HISTORIC CENTRE

### NEW ORBITAL ROUTE & SIGNAGE SYSTEM FOR CORK

Cork City Council has introduced a major new directional signage system for the city. The new system is designed to make it easier for motorists to find their way to and from major national and regional routes and to access parking in the city centre.

It will also help to redirect unnecessary traffic away from the city centre, thereby reducing overall traffic numbers, alleviating congestion levels and improving the environment.

Bus, cycle and pedestrian priority will also be improved.

### HOW DOES THE ORBITAL ROUTE WORK ?

The Route corresponds roughly to the outline of the City Centre Island area. The signage system is colour coded blue and white. Each junction on the orbital route has a unique number. This is displayed in a **BLUE** rectangle at the top of each sign.

When driving **on** the Orbital route the signs have a **BLUE** background. As you **approach** the Orbital route the signs have a **WHITE** background.

Directional information relating to parking, routes, tourist office, areas of interest, will be shown on these signs. The Orbital route can also be used in conjunction with a route map to plan your journey around the city and onwards to the nearby National road network.
