## 6. ASSESSMENT

It should be stated at the outset that the purpose of this report is not to determine the acceptability or otherwise of the proposal at this location in respect to the proper planning and sustainable development of the area, but rather whether or not the matter in question constitutes development, and if so falls within the scope of exempted development.

### 6.1 Development

The first issue for consideration is whether or not the matter at hand is 'development'.

'Development' as defined in the Act (3)(1) comprises two possible chief components: 'the carrying out of any works on, in, over or under land', or 'the making of any material change in the use of any structures or other land'. In order to ascertain whether or not the subject use is considered to be development as so defined, consideration must first be given to whether any works on, in, over or under land have or will be carried out, and secondly to whether any material change in the use of any structures or other land have or will take place.

'Works' is defined in section 2(1) of the Act as 'the carrying out of any works on, in, over, or under land' including 'any act or operation of construction, excavation, demolition, extension, alteration, repair or renewal, and in relation to a protected structure or proposed protected structure, includes any act or operation involving the application or removal of plaster, paint wallpaper, tiles or other material to or from the surfaces of the interior or exterior of a structure. '.

I consider that the proposed change of use will require works. Both the change of use and the associated modifications constitutes development.

### 6.2 Exempted development

The next issue for consideration is whether or not the matter at hand is exempted development.

Sufficient information (drawings, schedule of accommodation etc.) has been submitted to allow an assessment of the proposal to be undertaken against the criteria listed in Article 10(6) of the Planning and Development Regulations and this is assessed in detail below.

## 7. ENVIRONMENTAL ASSESSMENT

### 7.1 Screening for Environmental Impact Assessment

Having regard to the contents of Article 103 (as amended by Article 14 of the Planning and Development (Amendment) (No 3) Regulations 2011) and Schedule 7 of the Planning and Development Regulations 2001 (as amended) it is considered that the proposed development by reason of its nature, scale and location would not be likely to have significant effects on the environment. Accordingly it is considered that an environmental impact statement is not required to be submitted.

### 7.2 Screening for Appropriate Assessment

Section 177U (9) of the Act requires planning authorities to screen applications for a section 5 declaration for appropriate assessment. The provisions of the *Habitats Directive*, the *Appropriate Assessment Guidelines for Planning Authorities 2009* (revised 2010) and the Act are noted. The relevant European sites are the Cork Harbour SPA (site code 004030) and the Great Island Channel cSAC (site code 001058). Having regard to the location of the proposed development site relative to these European sites and related watercourses and to the nature and scale of the proposed development it is considered that the proposed development would not affect the integrity of the European sites referred to above. Accordingly it is considered that appropriate assessment is not required.
